## DETAILED ACTION

## Restriction

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-18, drawn to a product, classified in class 229, subclass 191.
  - II. Claims 19 and 20, drawn to a method of loading a product, classified in class 53, subclass unknown.

The inventions are distinct, each from the other because of the following reasons:

- 2. Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, the product as claimed can be used in a materially different process. For example, the box/box formed from the blank of claims 1-18 could be used in a process where each box/box formed from the blank is loaded with a single product which is in the shape of a parallelogram as opposed to claims 19 and 20 which require placing a plurality of containers within each box. Also, the box/box formed from the blank of claims 1-18 can be used in a process where a single container is provided and loaded as opposed to claims 19 and 20 which require a plurality of containers to be loaded, i.e. claims 1-18 do not require mass production and loading or provision of a plurality of like containers.
- 3. Because these inventions are distinct for the reasons given above and the search required for each Group is not required for the other Group, restriction for examination purposes as indicated is proper.

## Election of Species

4. If Group I, claims 1-18 above is elected, the following election of species requirement is also made with respect to claims 1-18:

5. This application contains claims directed to the following patentably distinct species of the claimed invention: I. Figs. 4-7, 22 and 23; II. Figs. 8-15 and 19-21; III. Figs. 16-18.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

6. Applicant is advised that the reply to this requirement to be complete must include an

election of the invention to be examined even though the requirement be traversed (37 CFR

1.143).
